

MATTHEW CHENEY

Derry, NH 03038

matt1cheney@gmail.com

6034253466

Throughout my career life I found that I enjoyed coding and wanted to get into software development. In mid 2019 I decided to enroll into an intensive 6 month coding program at UNH. Working full-time throughout this course proved to be quite difficult but incredibly rewarding! I would like a career where I would work both on the front-end and back-end. I have a jack-of-all trades type of attitude but my strengths are within back-end coding.

Authorized to work in the US for any employer

WORK EXPERIENCE

Fiber Splicer

Communications Construction Group, LLC - Epping, NH

October 2019 to Present

During my employment as a Groundhand, I made it a goal to move up into a Fiber Splicer position. In this position I have learned a great number of skills and continue to learn new skills everyday. As a Fiber Splicing Tech, my job is to strip and splice fiber optic cable in many different ways, all in strict time lines.

Groundhand

Communications construction group - Epping, NH

April 2018 to Present

My responsibilities include but are not limited to running fiber optic cable to buildings and down roadways. Inside/outside construction of fiber optic as well as coax cable. General warehousing and clerical duties. I drive F-550 bucket trucks as well as F-750 air class bucket trucks.

yard worker

East Coast Lumber - Hampstead, NH

August 2017 to Present

I am Responsible in helping customers load their vehicle with various building materials. This job requires a lot of heavy lifting. Especially large awkward objects such as doors, windows, and cabinetry. With this job i became licensed with a fork lift truck and i move various things such as lumber that can have a span up to 28 feet long.

Yard Driver

Walmart Distribution Center

2011 to October 2016

My responsibilities include moving 53 foot trailers to and from shipping docks for loading and unloading, within the distribution center yard. The challenges I experience each day include driving the trailers during inclement weather, moving large trucks within the constraints of the center yard, and maintaining a production goal of 156 trailer moves within my overnight 12 hour shift.

Shipping Clerk - My responsibilities include monitoring all freight going to the 120 different stores throughout New England as well as quality and weight checks. This position requires good person- able skills as well as good math skills.

Forklift Operator - As a forklift operator, my responsibilities were to move pallets of freight on and off the trucks, keeping up with the order and pace of the loaders and conveyors.

Loader - As a loader, my job consisted of loading boxes into 53-ft. trailers by hand, while keeping up with the fast pace of the automatic conveyors. The ability to keep a fast pace was paramount in keeping up with the required quota each night.

Donor Recruitment Associate

Caitlin Raymond International Bone Marrow Donor Registry

2010 to 2010

My responsibilities with the Registry included, but were not limited to: interaction with potential bone marrow donors by assisting with their registration, providing instruction to the donors on the proper procedure of collecting HLA test samples (cheek swab DNA samples), and properly preparing these samples for laboratory testing. I traveled to various locations and

helped set up booths, greet the public as they came to the booths, and to recruit them as potential donors.

This position required the ability to be very personable and make the potential donor feel very comfortable. It was truly a rewarding experience being part of a very successful team, helping to save lives.

Senior Facility Operator

Town of Sandown Sanitation Department - Sandown, NH

2007 to 2010

My responsibilities included greeting all citizens as they entered the facility, instructing them and monitoring them in the use of the facility to dispose of their household

waste. Operators must become certified by the State of NH Department of Environmental Services with proper disposal of waste products while maintaining a safe and environmentally responsible facility.

Assistant Custodian/Recycling Attendant - As an Assistant Custodian in the bulky waste division, my responsibilities included monitoring the patrons and their safe and proper disposal of all bulky waste. As a recycling attendant, my responsibilities included assisting patrons with the disposal of recyclables.

EDUCATION

Certificate in Full Stack Web Development

University of New Hampshire-Main Campus - Durham, NH

December 2019 to June 2020

Diploma

Timberlane Regional High school - Plaistow, NH

2009

CERTIFICATIONS AND LICENSES

Forklift Certified

November 2017 to November 2020
